Summary

Speaker	Lines	Done	Recorded	To record
Atlas	195	0	0	195
Dr. Vex	33	0	0	33
Flux	39	0	0	39
Prof. Gauss	2	0	0	2
Total	269	0	0	269

LIVE: in the game now, record first. PLANNED: written for the story, not in the game yet; its text may still change.

Contents

How to record

1. Record one character at a time: each has its own section, with the voice described at the top.
2. Read the line exactly as written. Words in CAPITALS are stressed; "..." is a pause; "—" means the line is cut off mid-word.
3. Stay inside the "max" length. Short and punchy beats slow and complete.
4. Record dry and close: no reverb, no effects, no music. The robot processing is added afterwards.
5. Record 3 takes of every line, and number them 1, 2, 3 in the file name (the best one first, if you can tell).
6. Format: OGG (Vorbis), mono, 48 kHz, highest quality setting (q 8 or more). No leading silence; half a second of room tone after each take is fine.
7. Save every take under the exact file name shown on its card, in the folder shown. The name is how the game finds it.
8. Tick the box on a card once its takes are saved.

Atlas

Flux's field AI

Voice: Gender-neutral to slightly low; calm, precise, warm underneath. A mission-control navigator who is also your friend. Dry humour by understatement. Never shouts: at critical moments it gets tighter and faster, not louder.

Dr. Vex

The showman doctor, the villain

Voice: Big, theatrical, pompous: a game-show host crossed with a vain surgeon. Relishes the words and stretches the big ones ("Maaag-nificent"). Over the top but never scary: the audience is all ages.

Avoid: Imitating any specific film villain's voice or catchphrases: the archetype, not an impression.
